

## 1. What exactly do you want to study?

You aim to study roommate conflicts among university students, with a focus on UTHM undergraduates enrolled in the ETP course. This includes understanding the **causes**, **impacts**, and **potential solutions** to these conflicts.

## 2. What is your research question or questions?

- What are **the main causes** of roommate conflicts among UTHM students?
- How do these **conflicts impact** their academic performance and mental well-being?
- What **strategies can be implemented** to manage and prevent these conflicts?

## 3. Why is it worth studying?

Roommate conflicts are a prevalent issue in student dormitories that can significantly affect **academic success, mental health, and social well-being**. Addressing these issues is critical for fostering a conducive learning and living environment.

## 4. What is the purpose or significance of your study?

The study aims to **identify the root causes of roommate conflicts**, **evaluate their consequences**, and **recommend practical strategies to resolve and prevent such disputes**. This will enhance student well-being and improve living conditions in shared spaces.

## 5. Does the proposed study have practical significance?

Yes, the study offers **actionable insights that can inform university policies**, **guide the design of dormitory rules**, and **provide students with conflict resolution strategies**. It can also inspire the development of workshops to promote harmonious living.

## 6. How are you defining your terms?

Key terms such as "**roommate conflict**" are defined in the context of **shared university dormitories**, encompassing interpersonal disagreements related to habits, boundaries, cultural differences, and shared responsibilities.

## 7. What are the limitations of your study?

The study is limited by:

- A small **sample size focused only on FSKTM** students taking the ETP course.
- Data collected solely through **close-ended questionnaires**, which may not capture the full **complexity of conflicts**.

## 8. What is your research study all about?

Your research explores the **dynamics of roommate relationships**, **the conflicts that arise**, and the **strategies for resolving** them to improve the student living experience.

## 9. Why did you choose this study?

Roommate **conflicts are a common challenge for university students**, and addressing these issues can lead to improved academic outcomes and well-being.

#### **10. Why did you choose this particular title for your research?**

The title, "Roommate Conflicts Among Students," directly reflects the study's focus on understanding and resolving issues in shared living spaces.

#### **11. What is the scope of your study?**

The study is focused on UTHM students in the ETP course, specifically those from the Faculty of Computer Science and Information Technology.

#### **12. What phenomenon were you trying to understand with this research?**

You aim to understand the nature of roommate conflicts, their underlying causes, and effective management solutions.

#### **13. Who will be most interested in your research?**

- Students seeking solutions to living difficulties.
- Educators who want to support student development.
- University administrators focused on improving campus life.

#### **14. Why is your research significant?**

The findings will contribute to a better understanding of the interpersonal dynamics in shared living spaces and provide actionable strategies to enhance the student experience.

#### **15. Why did you choose this research methodology?**

A survey-based quantitative approach allows for efficient data collection and analysis, making it easier to identify patterns and correlations among variables.

#### **16. How can your research be put into practice?**

The research can inform the development of workshops, conflict resolution programs, and university policies for harmonious living.

#### **17. What sources did you use for data collection?**

Data is collected through close-ended questionnaires distributed to a sample of UTHM students.

#### **18. What approach did you choose for your research?**

A quantitative research design with descriptive and inferential analysis methods.

#### **19. What's your motivation for this study?**

Your motivation stems from the desire to improve student well-being, academic performance, and the overall university living experience.

#### **20. How will this study contribute to the body of knowledge?**

The study will provide empirical data on the causes, effects, and resolutions of roommate conflicts, contributing to the literature on student interpersonal relationships.

**21. What is the significance of the study?**

The study highlights the importance of effective communication, boundary-setting, and mutual respect in shared living spaces.

**22. What limitations did you encounter?**

- A small sample size.
- Reliance on close-ended questionnaires, which may limit the depth of insights.

**23. How can your research study be put into practice?**

By developing educational materials, such as workshops and guidelines, to train students in conflict resolution skills.

**24. What are your research questions?**

- What causes roommate conflicts among UTHM students?
- What are the effects of these conflicts on students' lives?
- How can these conflicts be effectively managed?
